What Python

Python is an **interpreted high-level general-purpose programming language**. Python's design philosophy emphasizes **code readability** with its notable use of **significant indentation**.

Why Python

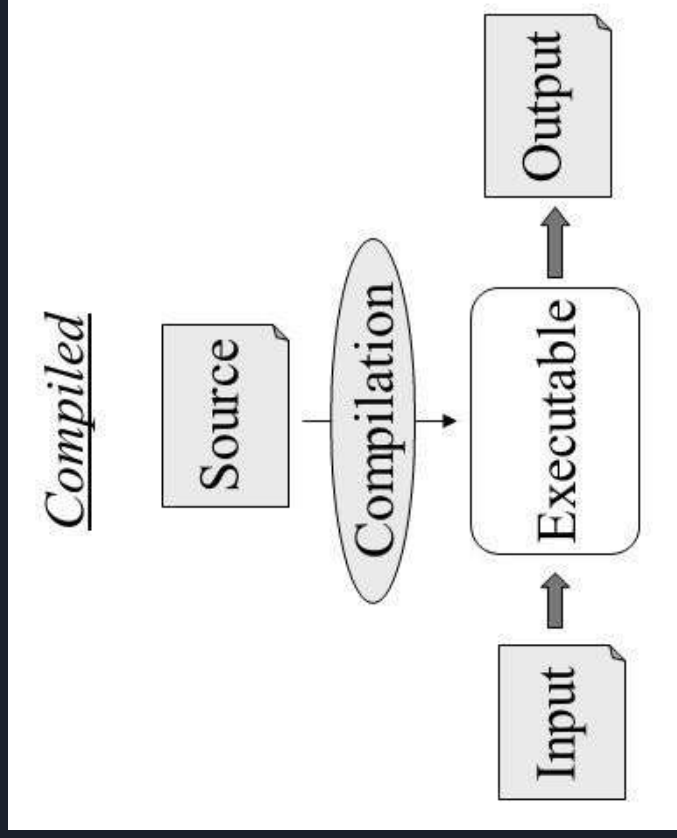

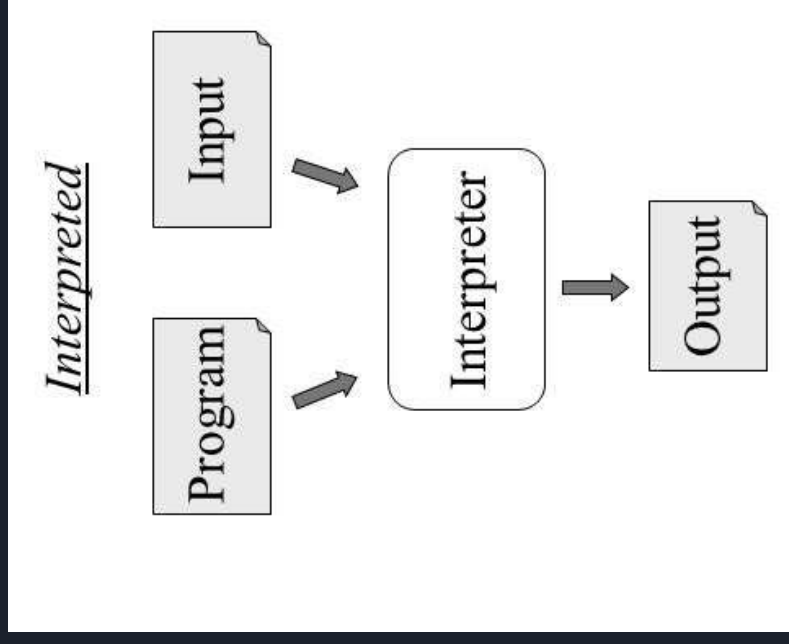

1. Easy to Learn and Use
2. Mature and Supportive Python Community
3. Support from Renowned Corporate Sponsors
4. Hundreds of Python Libraries and Frameworks
5. Efficiency, Reliability, and Speed
6. Big data, Machine Learning and Cloud Computing
7. The Flexibility of Python Language
8. Automation

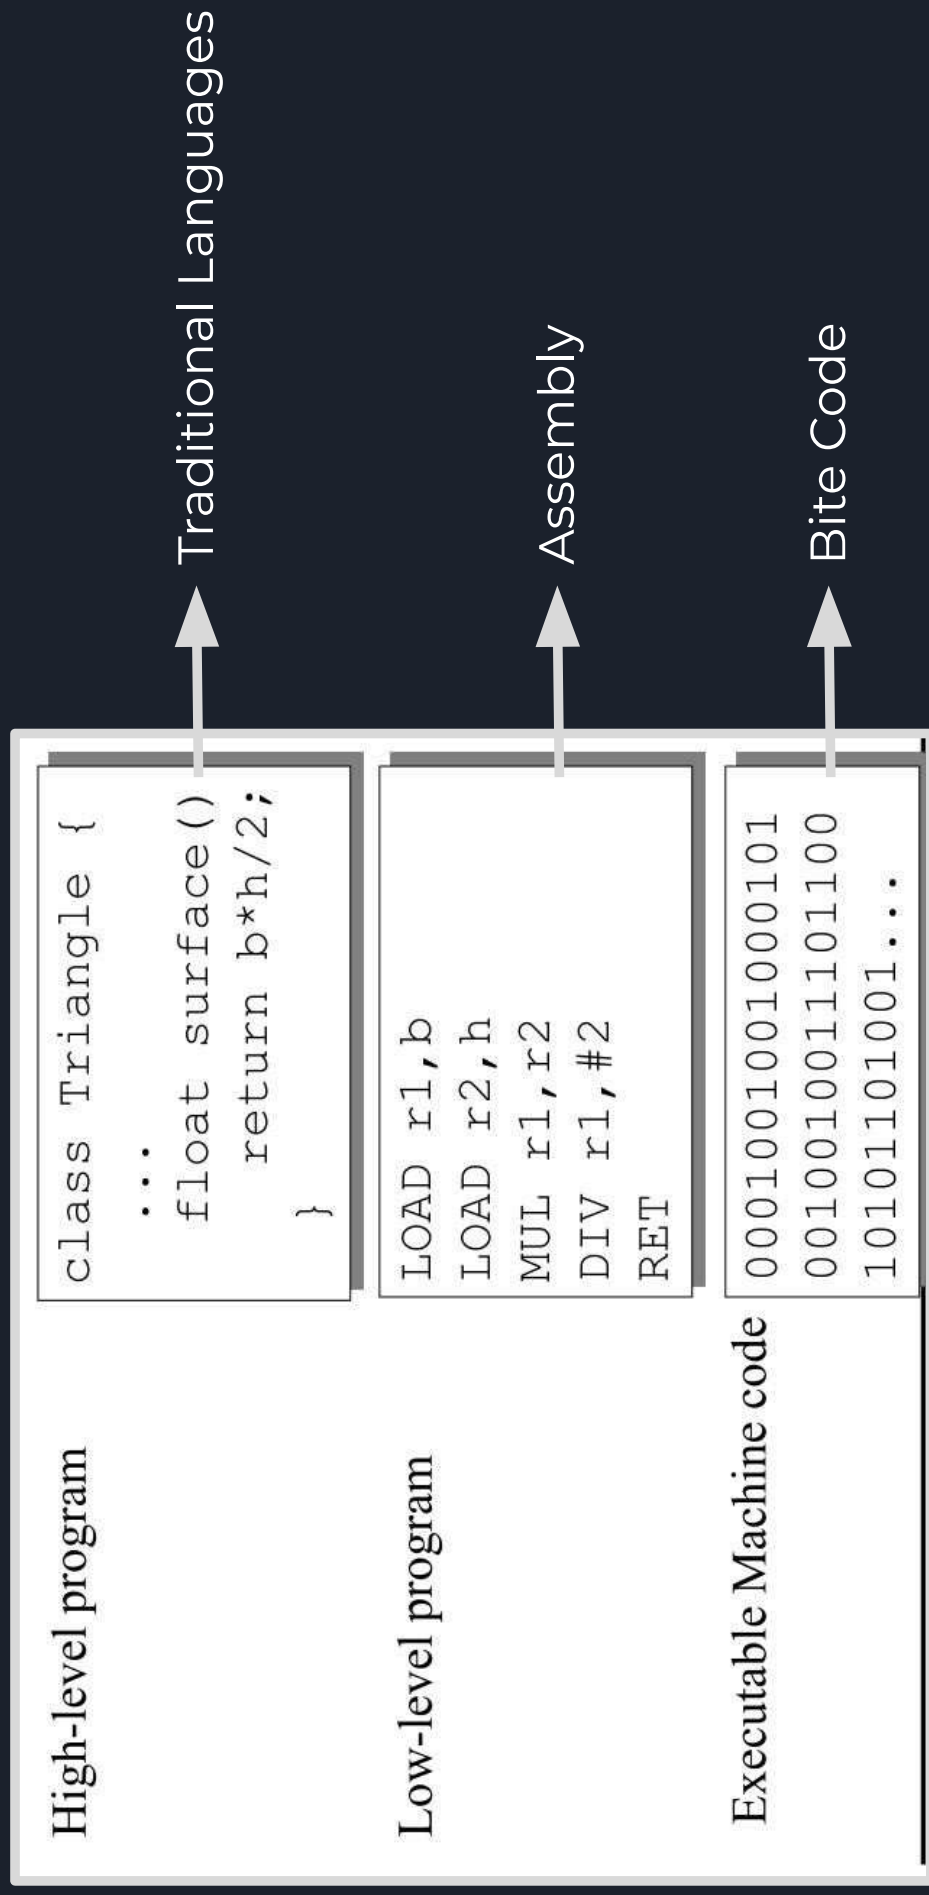

Why not Python

1. Speed limitations
2. Problems with threading
3. Not native to mobile environment
4. Memory consumption
5. Simplicity

Interpreted vs Compiled

High-level vs Low-level

General-purpose vs Specific

General-Purpose

1. Python
2. C,
3. C++
4. Java
5. C#

Specific-Purpose

1. SQL
2. HTML
3. CSS
4. XML
5. MD

Setup & Configure

IDEs vs Code editor

Visual Studio Code

First Programm

```
print("Hello World")
```
